DETAILED ACTION

Response to Amendment

1. This Non-Final office action is in response to Applicant's amendment filed August 9, 2008. Claims 4, 14, 15, 18 and 22 have been amended. Claims 4-6, 12, 14-19, 22-24, 30 and 32-37 are pending.
2. The previously pending rejections to claims 4-6, 12 and 14-19 under 35 U.S.C. 112, second paragraph, have been withdrawn.

Specification

3. The attempt to incorporate subject matter into this application by reference to Guy Druce, Level-1 Algorithm, v 1.6 (12/4/2000) is ineffective because the reference document is not clearly identified as required by 37 CFR 1.57(b)(2)), since the Examiner is unable to locate the document with the information provided in the specification.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
5. Claims 4-6, 12 and 14-19 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In order for a method to be considered a "process" under §101, a claimed process must either: (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials). *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972). If neither of these requirements is met by the claim, the method is not a patent eligible process under §101 and is non-statutory subject matter.

With respect to independent claim 4, the claim language recites the steps of computing an amount of free time required in a shift, creating a schedulable time block, examining the primary block, etc., however the claim language does not include the required tie or transformation. Moreover, the claim recites "computer-implemented" in the preamble, however this is considered a nominal tie that does not satisfy the requirement, wherein a preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hira*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Claims 5, 6, 12 and 14-19 are rejected based upon the same rationale, wherein the claim language does not include the required tie or transformation.

Allowable Subject Matter

6. Claims 22-24, 30 and 32-37 are allowed.
